

## General characteristics

### Performance:

- Extreme durability.
- Outstanding wear resistance.
- Extremely long life cycle compared to other resilient floorings.
- Antistatic.
- High resistance to chemicals.
- Dimensionally stable. No joint sealing required.
- Wide range of designs, colors and finishes.

### Maintenance Advantages:

- Economical and easy cleaning.
- Extremely dense surface.
- Significant reduction of water consumption and better cost/benefit ratio of installed flooring.

### Comfort and Safety:

- Anti slip properties.
- Walking comfort: Flexibility and permanent resilience.
- Resistant to cigarette burns. No damage to the surface and nicotine stains can be easily removed.
- Free of PVC, plasticizers (phthalates), halogens (e.g. chlorine), formaldehyde and heavy metals.
- Free of asbestos.
- In case of fire, they do not generate hydrogen chloride, dioxins, furans and cyanide derivatives, which are very dangerous for people and equipment.
- High footfall sound absorption.
- Extremely dense surface prevents the growth of mites and bacteria.
- No emission of hazardous substances which may damage people's health. Low emission of volatile organic compounds (VOC) under standard CA sections 01350.

### Environmental Compatibility:

- Eco-compatible manufacturing processes - no emission of toxic agents during production (gases, solids, and liquids).
- Include high pre- and post-consumer recycled content.
- Packaged with recycled materials.
- Eco-compatible raw materials: The natural rubber employed is a rapidly renewable resource.
- Use of mineral fillers from natural sources and eco-compatible color pigments.
- The natural and synthetic rubbers used in the manufacturing of Indelval rubber floorings are free of PVC, plasticizers (phthalates), formaldehyde, heavy metals, asbestos and halogens (e.g. chlorine).

### For special applications:

- Electrostatic conductive for ESD control.
- Extremely resistant to impact.
- Interlocked tile system.
- Raised access floor coverings.
- Indoor sports floorings for multipurpose use.
- Visually impaired assistance.
